As part of *Taking Ownership of the Future: The National Strategy for Financial Literacy*, the U.S. Departments of Education and Treasury invite you to the *Summit on K - Postsecondary Financial Education* which is being held on February 21 and 22, in Washington, DC.

At this Summit, we will discuss the many challenges to teaching young people about money. Some challenges include finding room for financial education in the school day and the lack of awareness of effective materials and curricula. While the K-12 environment is key to addressing the need for more financial education, non-school venues and college-level programs also offer promising options. Financial education practitioners from around the country will discuss innovative techniques used to improve youth financial literacy.

The *National Strategy* recognizes the importance of financial education as a cumulative process that should start at an early age. As described in Call to Action 10-1 of the National Strategy, the Summit's findings will be compiled and made available to educators, policymakers. and the public at large. The schedule for the Summit will be as follows:
