I. INTRODUCTION

A. PURPOSE

The Department of the Treasury, with the assistance of the Board of Governors of the Federal Reserve System and the Federal Reserve Bank of New York (FRBNY), is conducting a mandatory survey of the ownership of foreign securities, including selected money market instruments, by U.S. residents as of December 31. The data will be collected by the FRBNY, acting as fiscal agent for the Department of the Treasury. The data collected will be used by the U.S. Government in the computation of the U.S. balance of payments accounts and the U.S. international investment position, and in the formulation of international economic and financial policies. This report also is part of the Coordinated Portfolio Investment Survey (CPIS), an internationally coordinated effort under the auspices of the IMF, to improve the statistics on the holdings of foreign securities by major investing countries.

In order to reduce reporting burden and costs to the government, there will be a substantial reduction in the number of reporters in four out of every five years. A benchmark survey (Form SHC) of all significant U.S.-resident custodians and end-investors will continue to be held approximately every five years. In non-benchmark years, the annual survey (Form SHCA) will require reports from only the very largest U.S.-resident custodians and end-investors. The data reported under these annual surveys (Form SHCA) will be used in conjunction with the results of the previous benchmark survey to compute economy-wide estimates for the non-benchmark years.

The determination of who must report on the annual reports (Form SHCA) will be based upon the data submitted during the previous benchmark survey. Certain U.S.-resident custodians and end-investors (including fund managers) will be designated to file detailed foreign security data on Schedule 2 and data on foreign securities entrusted to U.S.-resident custodians on Schedule 3, i.e., they will be required to file in the same manner as they did on the December 31, 2006 benchmark survey.

B. AUTHORITY

This survey is conducted under the authority of the *International Investment and Trade in Services Survey Act* (22 U.S.C. 3101 et seq., [the Act]) and *Executive Order 11961* of January 19, 1977. The Act specifies that the President has the authority to conduct a regular data collection program, including such studies and reports as may be necessary and feasible, to secure current information on international investment, including (but not limited to) such information as may be necessary for computing and analyzing the balance of payments and the international investment position of the United States (22 U.S.C. 3103). In *Executive Order 11961* §2, the President designated the Secretary of the Treasury to be responsible for collecting data on portfolio investment required by the Act.

C. CONFIDENTIALITY OF DATA REPORTED

The information collected by this survey may be used only for analytical and statistical purposes and to enforce the Act. Access to the information is available only to officials and employees (including consultants and contractors and their employees) designated to perform functions under the Act. Persons having access to individual company information submitted pursuant to the Act are subject to penalties for unauthorized disclosure (22 U.S.C. §3104 and 18 U.S.C. §1905). The results of this survey will be made available to the general public at an aggregated level so that neither the U.S. persons or organizations providing information nor individual or organizational ownership of foreign securities can be identified.

D. PENALTIES FOR FAILURE TO REPORT

Reporting as directed in this package is mandatory for any U.S. person or organization subject to the reporting requirements set forth in the report instructions. Failure by an organization to provide timely and accurate data can result in a civil penalty of not less than \$2,500 and not more than \$25,000, or injunctive relief ordering such person to comply, or both (22 U.S.C. §3105(a)).

Willfully failing to submit any required information under the Act can result in a fine of not more than \$10,000; and, if an individual, may result in imprisonment for not more than a year, or both. Any officer, director, employee or agent who knowingly participates in such violation, upon conviction, may be punished by a like fine, imprisonment, or both (22 U.S.C. §3105(c)).

E. PAPERWORK REDUCTION ACT NOTICE

This report has been reviewed and approved by the Office of Management and Budget in accordance with the *Paperwork Reduction Act of 1995* and assigned OMB Control Number 1505-0146. The purpose is to collect accurate and complete data that will enable the Treasury Department to fulfill its responsibility under the Act. The estimated annual average preparation time per respondent (over five years) is about 84 hours, but this will vary widely from respondent to respondent. (a) In the year of a benchmark survey (using Form SHC), it is estimated that exempt SHC reporters will require an average of 16 hours; custodians of securities providing security-by-security information will require an average of 360 hours, but this figure will vary widely for individual custodians; end-investors providing security-by-security information will require an average of 120 hours; and end-investors and custodians employing U.S. custodians will require an average of 40 hours. (b) In a non-benchmark year (using Form SHCA), custodians of securities providing security-by-security information will require an average of 700 hours (because only the largest U.S.-resident custodians will report), end-investors providing security-by-security information will require an average of 145 hours; and SHCA reporters entrusting their foreign securities to U.S. custodians will require an average of 48 hours. Comments concerning the accuracy of this burden estimate and suggestions for reducing the burden should be directed to:

No person is required to respond to any U.S. Government collection of information unless it displays a currently valid OMB control number.

II. GENERAL INSTRUCTIONS

A. WHO MUST REPORT

All U.S.-resident custodians and end-investors that receive a copy of this SHCA booklet of forms and instructions from the Federal Reserve Bank of New York or are notified by the Federal Reserve Bank of New York that they are required to file must report. (See Section II.C, Exemptions.) All other entities are exempt from reporting.

1) **Custodians** are all organizations that hold securities in safekeeping for other organizations. Most U.S.-resident custodians also invest in foreign securities for their own account, i.e., are also U.S.-resident end-investors for purposes of this report. U.S.-resident custodians should report both the foreign securities held in safekeeping for other U.S. residents and their own foreign securities.

2) **End-Investors** are U.S. resident organizations that invest in foreign securities for their own portfolio. This includes securities that are held-for-trading, available-for-sale, held-for-maturity, or which have been invested on behalf of others by managers of mutual funds, insurance companies, and pension funds. Collectively such investors are referred to as “end-investors” throughout these instructions. U.S.-resident end-investors include, but are not limited to:

Financial and non-financial organizations
Managers of private and public pension funds
Managers of mutual funds, country funds, unit-investment funds, exchange-traded funds, collective-investment trusts, or any other similarly pooled, commingled fund
Insurance companies
Foundations
Institutions of higher learning (e.g., university endowments)
Trusts and estates

Reports should include all reportable securities held or managed by all U.S.-resident parts of your organization, including all U.S.-resident branches, offices, and subsidiaries. U.S. residents include organizations located in the Commonwealth of Puerto Rico and U.S. territories and possessions. Please see Appendix H for the complete definition of United States. It is the responsibility of the parent entity in each organization to ensure that its report covers all applicable entities within the organization.

If any of the following conditions apply, please contact the FRBNY staff:

- Your organization is not the top parent U.S.-resident entity in your organization and has received the forms and instructions from, or has been notified of its obligation to report by, the Federal Reserve Bank of New York.
- Your organization cannot submit a single report for the entire organization.

Additional copies of the reporting forms and instructions may be printed from the Internet at:

<http://www.treas.gov/tic/forms.html#benchmark>

B. WHICH SCHEDULES TO REPORT

- **Schedule 1**

Schedule 1 must be filed by all entities that 1) receive a copy of the SHCA forms and instructions from the Federal Reserve Bank of New York, or 2) are notified by the Federal Reserve Bank of New York that they are required to file the SHCA report.

Schedule 1 requests information that identifies the reporter. It also provides contact information, indicates the reporting status, and summarizes the data, if any, reported on Schedule 2 and/or Schedule 3.

- **Schedule 2:**

Schedule 2 is used to report detailed information on foreign securities (1) that the reporter safekeeps for itself or for its U.S.-resident clients or (2) for which the reporter directly employs foreign-resident sub-custodians or U.S.-resident or foreign-resident central securities depositories to manage the safekeeping of those securities (See Section III.H.).

- **Schedule 3:**

Schedule 3 is used to report summary amounts for all foreign securities entrusted to the safekeeping of a U.S.-resident custodian (excluding U.S.-resident central securities depositories) (See Section III.H.).

C. EXEMPTIONS

- **Schedule 1**

If you have received these forms and instructions from the Federal Reserve Bank of New York, there is NO exemption level for **Schedule 1**. You must submit the reporter identification, the contact and certifying information parts of **Schedule 1**. However, items requesting aggregate data on foreign securities on Schedule 1 should be left blank if you are not required to report data on Schedule 2 or Schedule 3.

- **Schedule 2**

SHCA reporters are exempt from reporting on Schedule 2 if the total fair (market) value of foreign securities whose safekeeping they manage for themselves and for other U.S. residents or whose safekeeping the reporter has entrusted directly to foreign-resident custodians or U.S. or foreign-resident central securities depositories **is less than US\$ 100 million** (aggregated over all accounts) as of December 31.

- **Schedule 3**

SHCA reporters are exempt from reporting on a Schedule 3 holdings entrusted to another U.S.-resident custodian if the total fair (market) value of the foreign securities entrusted to that U.S.-resident custodian – aggregated over all accounts they own and all accounts they manage for other U.S. residents - **is less than US\$ 100 million** as of December 31.

III. WHAT SECURITIES MUST BE REPORTED

This report collects information on U.S. resident holdings of foreign securities, including foreign equities, short-term debt securities (including selected money market instruments), and long-term debt securities. Asset-backed securities are to be reported separately from other debt securities. Foreign securities include all securities issued by entities that are established under the laws of a foreign country (i.e., any entity that is legally incorporated, otherwise legally organized, or licensed (such as branches) in a foreign country) and all securities issued by international organizations, such as the International Bank for Reconstruction and Development (IBRD or World Bank), and the Inter-American Development Bank (IADB), even if these organizations are located in the United States.

Reportable securities may be traded or issued in the United States and in foreign countries, and may be denominated in any currency, including euros and U.S. dollars. Neither the country in which the securities are traded or issued, nor the currency in which the securities are denominated, is relevant in determining whether the securities are reportable.

As an exception, foreign securities held by a U.S. depository to back depository receipts/shares should not be reported. Instead, the holders of the depository receipts/shares should report the receipts/shares. This exception is necessary to identify the portion of depository receipts/shares actually held by U.S. residents, because many depository receipts/shares are held by foreign residents.

A. REPORTABLE FOREIGN SECURITIES

Reportable securities include:

- Securities issued by international and regional organizations, such as the International Bank for Reconstruction and Development (IBRD or World Bank) or the Inter-American Development Bank (IDB).
- Securities issued in the United States by foreign-resident organizations (e.g., Canadian or Mexican firms), even if they are denominated in U.S. dollars and trade on U.S. securities exchanges.
- Securities issued by foreign-resident subsidiaries of U.S.-resident organizations (e.g., GMAC Canada) and foreign-resident offices of U.S. banks or U.S. broker/dealers, even if they are guaranteed by the U.S. parent company, or issued in the United States.
- Depository receipts/shares, including American Depositary Receipts (ADRs), American Depositary Shares (ADS), Global Depositary Receipts (GDRs), and International Depositary Receipts (IDRs), if the underlying securities are issued by foreign residents— (See Section III.E.).
- Securities issued by foreign-resident entities under Section 144A of the SEC Act.
- Money market instruments, including negotiable certificates of deposit (CDs), issued by foreign-resident entities.

Equity securities represent an ownership interest in foreign-resident organizations.

Include as equities:

- Common stock (ordinary shares);
- Preferred stock (participating and nonparticipating preference shares);
- Restricted stock;
- Depository receipts/shares (e.g., ADRs, ADSs, GDRs, IDRs) **provided** the underlying securities used to collateralize the receipts/shares **are** foreign securities (See Section III.E.);
- Shares/units in foreign-resident funds, investment trusts, and similar investment vehicles (including mutual funds and money market funds— (See Section III.C.);
- U.S.-resident limited partner ownership in foreign-resident limited partnerships (general partner ownership is excluded – (See Section III.J.); and
- Other equity securities.

Short-Term Debt Securities include bills, commercial paper, and other money market instruments specified below with an **original maturity of one year or less** that give the holder the unconditional right to financial assets. (Asset-backed short-term debt securities should be reported as asset-backed securities (see below).)

Include as short-term debt securities:

- Short-term foreign government securities;
- Short-term bankers' acceptances and trade acceptances;
- Short-term commercial and financial paper, including asset-backed commercial paper;
- Short-term **negotiable** certificates of deposit, bank notes, and deposit notes;
- Short-term notes issued under note issuance facilities and revolving underwriting facilities, even though the underlying facility may be for more than one year;
- Short-term medium-term notes;
- Short-term promissory notes;
- Stripped securities with an original maturity of one year or less; and
- Other short-term debt securities.

Long-Term Debt Securities (excluding asset-backed securities) include bonds and notes, with an **original maturity of over one year**, that usually give the holder the unconditional right to financial assets.

Include as long-term debt securities:

- Bonds such as foreign treasury, zero coupon, stripped, deep-discounted, currency-linked (e.g., dual-currency), floating rate, equity-related (e.g., convertible bonds) bonds and Eurobonds;
- Long-term index-linked debt securities;
- Long-term floating rate notes (FRN), such as perpetual notes (PRN), variable rate notes (VRN), structured FRN, reverse FRN, collared FRN, step up recovery FR (SURF), and range/corridor/accrual notes;
- Long-term medium-term notes;
- Bonds with multiple call options, the last of which is more than one year after issue;
- Long-term debentures;
- Long-term negotiable certificates of deposit, bank notes, and deposit notes;
- Long-term bearer depositary receipts denoting ownership of debt securities issued by nonresidents;
- Brady bonds;
- Covered bonds (e.g., Pfandbriefe);
- Long-term securities backed by a sinking fund; and
- Other long-term debt securities.

Asset-Backed Securities are securitized interests in a pool of assets, which give the purchaser a claim against the cash flows generated by the underlying assets. In many cases, the security's outstanding principal is reduced over time as principal repayments are received and passed on to the holders of the security. Securities backed by revolving credits, such as pools of credit card receivables, do not meet this criterion, but are still classified as ABS if the return to the holder is based upon these credits, (i.e., the credits do not merely serve as collateral). The ABS is reported if the **issuer securitizing the assets** is a foreign resident. The underlying asset should not be used to determine if the securities are reportable. Asset-backed commercial paper should be reported as commercial paper with other short-term debt.

Include as asset-backed securities all collateralized mortgage obligations (CMOs), collateralized bond obligations (CBOs), collateralized loan obligations (CLOs), collateralized debt obligations (CDOs), and other securities which give the purchaser a claim against the cash flows generated by pools of:

- Mortgages;
- Credit card receivables;
- Automobile loans;
- Consumer and personal loans;
- Commercial and industrial loans and other whole loans; and
- Other assets.

B. DO NOT REPORT

Do not report any:

- Derivative contracts (including futures, forwards, swaps, options, and warrants) meeting the definition of a derivative under FAS 133. If the embedded derivative has not been bifurcated from the host contract under FAS 133, then the security should be reported without separating the embedded derivative from the host contract. However, if the embedded derivative is bifurcated from the host contract, then the derivative should be excluded from the report and the host security should be included on the report.
- Loans and loan participation certificates;
- Letters of credit;
- Non-negotiable certificates of deposit ;
- Bank deposits, including time deposits (except for negotiable CDs) and demand deposits;
- Foreign securities temporarily acquired under reverse repurchase, borrowing, or lending arrangements (See Section III.D.);
- The underlying security of a depositary receipt, even if a foreign security (See Section III.E.);
- Direct investments (See Section III.G.), including investments in real estate and general partner ownership in limited partnerships (however, limited partner ownership are reportable investments);and
- All U.S. securities, including:
 1. Securities issued by U.S.-resident organizations, even if they are denominated in foreign currencies or traded on foreign securities exchanges;
 2. Securities issued by U.S.-resident subsidiaries of foreign-resident organizations and U.S.-resident offices of foreign banks or foreign broker/dealers, even if they are guaranteed by the foreign parent company, or issued outside of the United States;
 3. Securities issued by U.S.-resident entities under Section 144A of the SEC Act;
 4. Ownership of shares of U.S.-resident funds, even if the fund invests in foreign securities (See Section III.C.); and
 5. Stripped securities issued by a U.S.-resident financial institution, even if the underlying security is a foreign security (See Section III.F.).

C. FUNDS AND RELATED EQUITY HOLDINGS

1. Report U.S. residents' ownership of shares/units of funds legally established outside of the United States (foreign-resident funds) as equity securities. All U.S. residents' holdings of foreign-resident funds should be assigned security type 3 (fund shares), and not categorized as a debt security, regardless of the types of securities held by the fund.

For purposes of this report, funds include all investment vehicles that pool investors' money and invest the pooled money in one or more of a variety of assets. Funds include, but are not limited to:

- Mutual funds (including both closed-end and open-end mutual funds);
- Money market funds;
- Investment trusts;
- Index-linked funds;
- Exchange traded funds (ETFs); and
- Common trust funds.

The determination of whether fund shares are foreign securities is based on the country in which the fund is legally established, not on the type of securities the fund purchases. For example, a share in a fund organized in

Bermuda that purchases U.S. Treasury securities is a reportable foreign equity security. Likewise, a share in a fund established in the United States is a U.S. security and should be excluded from the report, even if the U.S.-resident fund invests in foreign securities.

Many funds established outside the United States have names that are similar to U.S.-resident fund names. This often occurs when the fund is managed by a group that manages many U.S.-resident funds and therefore may be thought of as managing only U.S.-resident funds. If there is doubt as to whether the investment should be classified as a fund or whether a fund is U.S. or foreign, please contact FRBNY report staff at (212) 720-6300 or (646) 720-6300.

2. Report U.S.-resident funds' ownership of foreign securities.

Although ownership of shares of U.S.-resident funds is excluded from this report, the foreign securities owned by U.S.-resident funds are reportable. These are distinct holdings and, therefore, are not duplicate reporting. Foreign securities owned by U.S.-resident funds should be classified as equity, debt, or asset-backed securities, as indicated in Section III.A.

D. SECURITIES INVOLVED IN REPURCHASE AND SECURITIES LENDING ARRANGEMENTS

A repurchase agreement (repo) is an arrangement involving the sale of securities at a specified price for cash with a commitment to repurchase the same or similar securities at a specified price on a future date. A reverse repo is an agreement whereby a security is purchased at a specified price with a commitment to resell the same or similar securities at a specified price on a specified future date. Securities lending/borrowing arrangements are agreements whereby the ownership of a security is transferred in return for collateral, usually another security or cash, under condition that the security or similar security will revert to its original owner at a future date. All of these arrangements, as well as buy/sell agreements, should be treated as follows:

- Securities sold under repurchase agreements or lent under securities lending arrangements, or collateral provided, should be reported by the original owner of the securities (or their U.S.-resident custodian) as if the securities were continuously held; that is, as if the repurchase or security lending agreement did not exist. Thus, if a U.S. resident transferred a foreign security under a repurchase or securities lending arrangement, the U.S. resident (or their U.S.-resident custodian) transferring the security should include it in its Schedule 2 or Schedule 3 records. The country reported should be the country of the issuer of the security and not the country of the counterparty to the repo or other agreement.
- Securities, including collateral, temporarily acquired by U.S. residents under reverse repurchase or borrowing or lending arrangements should not be reported.
- However, if cash was temporarily received as collateral and was used to purchase securities, those securities should be reported.

E. DEPOSITARY RECEIPTS/SHARES

Depositary receipts/shares, including American depositary receipts (ADRs) or bearer depositary receipts, should be attributed to the country of residence of the issuer of the security underlying the depositary receipt/share. Issuers of depositary receipts/shares should **not** report their holdings of the actual foreign securities. Only U.S. residents' holdings of depositary receipts/shares should be reported.

In addition, the security type reported should be determined based on the security underlying the depositary receipt/share. For example, if the underlying security is foreign common stock then the security type reported in Item 7 of the Schedule 2 should be 1 (common stock).

F. STRIPPED SECURITIES

Stripped securities are securities that have been transformed from a principal amount with periodic interest coupons into a series of zero coupon securities, with the range of maturities matching the coupon payment dates and the redemption date of the principal amount.

The country of residence of a stripped security is the country of residence of the entity that issued the stripped security, not the country of residence of the entity that issued the underlying security. Stripped securities issued by foreign residents, (the interest-only (IO) component, the principal-only (PO) component and tranches of stripped asset-backed securities), and held by U.S. residents are reportable. If a U.S.-resident financial institution issued the stripped securities, the issuer of the stripped securities should report its ownership of the underlying foreign securities. Exclude U.S. residents' holdings of stripped securities issued by a U.S.-resident financial institution.

G. DIRECT INVESTMENT

All holdings known to be direct investment should be excluded from the survey.

A direct investment relationship exists when a U.S. company owns 10% or more of the voting equity securities of an incorporated foreign business (or an equivalent interest in an unincorporated foreign business or branch. (See Section III.K.) If a direct investment relationship exists, then, in general, all securities held by the parent entity that were issued by the affiliate of the parent are considered to be direct investment. **However, if one of the entities is a banking or securities brokerage firm, then inter-company holdings are considered to be direct investment only if they provide permanent capital.** All holdings known to be direct investment should be excluded from this report.

H. SECURITIES HELD BY CENTRAL SECURITIES DEPOSITORIES

Foreign securities entrusted to U.S.-resident custodians that are in turn held at a U.S.-resident central securities depository (such as the Depository Trust Company or the Federal Reserve Bank of New York), or a foreign-resident central securities depository (such as Euroclear or Clearstream), must be reported by the U.S.-resident custodian, not by the U.S. or foreign-resident central securities depository. Likewise, foreign securities held by a U.S.-resident end-investor directly with a U.S.-resident or foreign-resident central securities depository must be reported by the U.S.-resident end-investor, not by the central securities depository.

Foreign securities provided to the Federal Reserve Bank of New York (FRBNY) for discount window loan collateral must be reported by the "lender" of the securities, not by the FRBNY.

I. COUNTRY ATTRIBUTION

Except for international and regional organizations, and depository receipts, securities should be reported based upon **the country of residence of the issuer of the securities**. The country of residence of any entity is where it is legally incorporated or otherwise legally organized, with the exception of bank branches, which are reported by where they are licensed. In cases where a foreign subsidiary of a U.S.-resident organization issues a reportable security, report these securities in the country where the foreign subsidiary is resident if the security is the direct legal obligation of the foreign subsidiary.

Securities issued by international and regional organizations are not allocated to the country in which the international or regional organization is located but rather to the separate code for international and regional organizations (79995). (Refer to Appendix E for a list of international and regional organizations.) Depository receipts should be attributed to the country of residence of the issuer of the security underlying the depository receipt.

Attribution of country of residence of the issuer should **not** be affected by the currency of issue or by the country of a guarantor.

J. LIMITED PARTNERSHIPS

U.S.-resident limited partner ownership of foreign-resident limited partnerships should be reported as Other Equity (Schedule 2, Item 7 = 4). Limited partners' ownership does not carry voting rights; therefore, such ownership, even if greater than 10%, is reportable. The Number of Shares Held field on the Schedule 2 (Item 16) should be defaulted to the value reported in the US\$ Market Value field (Item 14a) because limited partnerships do not issue shares.

U.S.-resident general partner ownership of foreign-resident limited partnerships is always considered to be direct investment and is excluded from this report.

K. ACCOUNTING RULES, VALUATION OF SECURITIES, AND CALCULATION OF U.S. DOLLAR VALUES

Accounting Rules

All securities should be reported using settlement date accounting. Gross long positions should be reported. Do not net any short positions from long positions. Do not enter decimals or negative values in any cells.

Valuation of Securities

Report the fair (market) value of securities as December 31. The fair (market) value follows the definition of FAS 157. Fair value is the amount at which an asset could be bought or sold in a current transaction between willing parties, other than in a forced or liquidation sale. If a quoted market price is available for an instrument, the fair (market) value is the product of the number of trading units times that market price. For securities that do not regularly trade, the estimate of fair value should be based on the best information available in the circumstances. The estimate of fair value should consider prices for similar assets and the results of valuation techniques to the extent available in the circumstances. Examples of valuation techniques include discounted cash flow, matrix pricing, option-adjusted spread models and fundamental analysis.

For asset-backed securities, the fair (market) value of the unpaid principal amount outstanding on December 31 should be reported; if principal has been repaid, this fair (market) value will **not** be the same as the original face value revalued at end-period market prices.

U.S.-resident custodians should, at a minimum, report the fair (market) value to the extent that it is available as part of their normal services provided to customers, even if the price available is prior to December 31. If there is doubt as to whether to report the available fair (market) value or to report a fair (market) value of zero, please contact FRBNY report staff at (212) 720-6300 or (646) 720-6300.

Foreign Currency Denominated Securities – Calculation Of U.S. Dollar Values

If the security is not denominated in U.S. dollars (US\$) and a US\$ fair (market) value is not available in your system, convert the foreign currency denominated fair (market) value into US\$ using the spot exchange rate as of December 31. If you need assistance locating an exchange rate, please contact FRBNY staff at (212) 720-6300 or (646) 720-6300.

If the exchange rate is normally quoted in units of foreign currency per US\$, such as ¥105.75/US\$, divide foreign currency values by the foreign exchange rate to obtain the US\$ values. For example, if the value of a security issued in Japan is ¥ 200,000, divide ¥ 200,000 by 105.75 to obtain US\$ 1,891.

If the exchange rate is normally quoted in US\$ per units of the foreign currency, such as US\$1.75/UK£, then multiply foreign currency values by the US\$ exchange rate value of the foreign currency to obtain US\$ values.

For example, if the value of a security issued in the United Kingdom is UK £1,000, multiply UK £1,000 by 1.75 to obtain US\$ 1,750.

APPENDIX H: GLOSSARY

AMERICAN DEPOSITARY RECEIPT (ADR) – Negotiable certificates, typically issued by a U.S.-resident company, for shares of stock issued by a foreign corporation. The securities are held in a custodial account, either at the issuing bank or by an agent. The ADR should be reported, not the foreign securities held by the depository. Report the ADR as common stock (security type=1) if the underlying foreign security is common stock or as preferred stock (security type =2) if the underlying foreign security is preferred stock. (See Section III.E for more information on the correct reporting of these securities.)

AMERICAN DEPOSITARY SHARE (ADS) – Negotiable securities certificate issued in the United States by transfer agents acting on behalf of foreign issuers, where the foreign issuers absorb part or all of the handling costs involved. The ADS should be reported, not the foreign securities held in custody. Report the ADS as common stock (security type =1) if the underlying foreign security is common stock or as preferred stock (security type =2) if the underlying foreign security is preferred stock. (See Section III.E for more information on the correct reporting of these securities.)

ASSET-BACKED SECURITIES – Securitized interests in a pool of assets, which give the purchaser a claim against the cash flows generated by the underlying assets. These pools may be derived from mortgage loans, auto loans, credit card receivables, vehicle and equipment leases, consumer loans, commercial loans or other assets. Include as asset-backed securities (ABS): CMOs, CLOs, CBOs and CDOs. ABS give the holder an undivided interest in the securitized assets and payments made from the cash flows received by the issuer from the payments of principal and interest from the borrowers. (ABS do not include securities, such as covered bonds or pfandbriefes, where the security is collateralized, but the holder of the security does not have a claim of the cash flows generated by the collateral.) ABS, including stripped ABS, are reported as security type 10 (asset-backed security), **except** for asset-backed commercial paper, which is reported as security type 5 (commercial paper).

BEARER BOND – Securities that are not registered in the name of their owner. The owner collects interest and dividends upon presentation of detachable coupons to a bank or fiduciary agent. These securities are reported as security type 9 (unstripped bond or note and all other long-term debt).

BRADY BONDS – Collateralized dollar-denominated bonds issued by a foreign government or central bank in exchange for loans under the Brady Plan. These securities are reported as all other long-term debt (security type = 9).

COMMERCIAL PAPER – A promissory note, either unsecured or backed by assets such as loans or mortgages. They are usually sold at a discount and customarily have a fixed maturity of 270 days or less. All commercial paper should be reported as security type = 5 (commercial paper)

COMMINGLED ACCOUNT – An account in which the investment funds of individual clients are pooled, with each client owning portions of the pooled account. Foreign securities held in commingled accounts should be reported.

CONVERTIBLE BOND – A bond that can be exchanged at a set price for equity securities by the holder under certain conditions. These securities are reported as convertible debt (security type = 7).

COVERED BOND – Also known as Mortgage Bond or Pfandbriefe. A bond that is backed by loans, typically mortgages, but does not give the purchaser a claim against the cash flows generated by the

underlying assets. These securities are reported as security type 9 (unstripped bond or note and all other long-term debt).

CUSTODIAN – A bank or other organization that manages or administers the custody or safekeeping of stock certificates, debt securities, or other assets for institutional and private investors.

DEPOSITARY RECEIPTS – See American Depositary Receipts (ADR). Related types of depositary receipts, such as Global Depositary Receipts, are reported in the same manner as ADRs.

DEPOSITORY – An entity that holds securities, either in certificated or uncertificated (dematerialized) form, to enable the transfer of ownership of securities. Depositories are not necessarily custodians, since they may be responsible only for registering and settling security transactions.

DERIVATIVE CONTRACT – Financial instrument or other contract with all three of the following characteristics:

1. (a) One or more underlyings; (b) one or more notional amounts; and (c) payment provisions. These terms determine the amount of the settlement or settlements, and, in some cases, whether or not a settlement is required.
2. Requires no initial investment, or an initial net investment that is much smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors.
3. The terms require or permit net settlement, it can readily be settled net by a means outside the contract, or it provides for delivery of an asset that puts the recipient in a position not substantially different from net settlement.

Derivative contracts are excluded from the report. Embedded derivatives that are not bifurcated under FAS 133 should be reported without separating the embedded derivative from the host contract. However, if the embedded derivative is bifurcated from the host contract, then the derivative should be excluded from the report and the host security should be included on the report.

DEVELOPMENT BANKS – Entities owned by national governments and established to promote economic development of sectors of the economy, such as trade, housing, agriculture, finance and industry. Securities issued by foreign development banks should be reported.

DIRECT INVESTMENT – The beneficial ownership or control, by one person or by a group of affiliated persons, of 10 percent or more of the voting securities of another incorporated business, or an equivalent interest in an unincorporated business, including a branch. If a direct investment relationship exists, then generally, all financial flows between the firms are considered direct investment. However, for banking institutions, direct investment is limited to intercompany holdings that are permanent investment. Direct investment positions are excluded from this report.

END-INVESTOR – An entity that invests in foreign securities for its own account (for trading, investment, or any other purpose) or invests on behalf of others, including asset pools, such as managers of mutual funds, managers of insurance company policyholder assets, and pension fund managers. (See Section II.A for examples of end-investors.)

FOREIGN RESIDENT - Any individual, corporation, or other organization located outside the United States. A corporation incorporated outside the United States is a foreign resident even if it has no physical presence outside the United States. Foreigners/foreign residents include:

2. Entities that have filed an IRS Form W-8, indicating that the individual or entity is a nonresident alien or foreign entity not subject to certain United States information return reporting or to backup withholding rules.

(However, all U.S.-resident subsidiaries of foreign corporations, including government-owned foreign corporations, are U.S. residents.)
5. International or regional organizations or subordinate or affiliated agencies thereof, created by treaty or convention between sovereign states, even if located in the United States, including the International Bank for Reconstruction and Development (IBRD or World Bank), the International Monetary Fund (IMF), and the United Nations (UN). (See Appendix E for a list of international and regional organizations.)

FOREIGN-RESIDENT CUSTODIAN – A custodian located outside the United States, including a foreign affiliate of a U.S. custodian. Reporters should determine the location of a custodian according to the country in which the custodian is incorporated, or otherwise legally established, not according to the country of the custodian's parent firm, and not according to the location of the custodian's operations center.

FOREIGN SUB CUSTODIAN – A foreign institution that holds in safekeeping foreign securities for a U.S.-resident custodian.

FUNDS – Pooled, separate and general investment accounts of one or more of the following institutional and private investors: private and public pension funds; mutual funds, country funds, exchange traded funds, unit investment trusts, collective-investment trusts, and any other similarly pooled, commingled investment funds; insurance companies; foundations; institutions of higher learning; government-sponsored enterprises and other independently acting government agencies; financial and nonfinancial corporations; investment advisors; trusts and estates; and private individuals. U.S. ownership of shares of foreign-resident funds are reported as funds (security type= 3), regardless of the types of securities held by the fund. Foreign securities held in U.S.-resident funds should also be reported. (See Section III.0 for the correct reporting of funds.)

INVESTMENT TRUST SHARE – A share of a company bound by a trust deed issued in registered form, formed to invest in specific types of securities. Shares in an investment trust can usually be bought and sold only through the stock exchange. Sometimes referred to as a 'closed-end' fund. LONG-TERM DEBT SECURITY – Debt security with no contractual maturity or with an original maturity of more than one year.

NEGOTIABLE CERTIFICATES OF DEPOSIT – A negotiable (transferable) instrument or deposit in book entry form evidenced by a receipt or similar acknowledgement issued by a bank, which provides on its face that the amount of such deposit is payable to bearer or any specified person (e.g., deposit notes, bank notes). These negotiable money market instruments should be reported as security type 6.

SECURITY – Any bill, note, bond, debenture, equity, negotiable money market instrument, or similar instrument that is commonly referred to as a security, whether or not it is tradeable. Do not include loans, even if tradeable. See Section III.A for a list of reportable foreign securities.

SETTLEMENT DATE – The date a security is delivered to the purchaser.

SETTLEMENT DATE ACCOUNTING – Under settlement date accounting, the purchase and sale of assets are not recorded until the settlement date. Settlement date accounting should be used for purposes of this report.

SHORT-TERM – Original maturity of one year or less.

SHORT-TERM DEBT SECURITY – Debt security, including negotiable money market instruments, with an original maturity of one year or less.

STRUCTURED NOTE OR BOND – An over-the-counter financial instrument created specifically to meet the needs of one or a small number of investors. Some of the more common structures include: step-up bonds, index amortizing notes, dual index notes, deleveraged bonds, range bonds, and inverse floaters. These securities are reportable debt securities.

SUBORDINATED DEBT – A security evidencing debt that the holder agrees to rank after senior creditors, but before shareholders, in a bankruptcy.

SUBSIDIARY – A company in which another company (parent) owns 50 percent or more of the voting securities, or an equivalent interest.

UNIT INVESTMENT TRUST – A fixed portfolio of securities that are assembled by an underwriter sponsor and upon completion of the underwriting, are deposited with an independent trustee. Unit investment trusts have a definite termination date, usually between 6 months and 10 years. U.S. ownership of shares of foreign-resident unit investment trusts are reported as fund shares (security type = 3), regardless of the types

of securities in held by the trust. Foreign securities held in U.S.-resident unit investment trusts should also be reported. (See Section III.0 for the correct reporting of unit investment trusts.)

U.S. RESIDENT – Any individual, corporation, or other organization located in the United States, including branches, subsidiaries and affiliates of foreign entities located in the United States. Corporations incorporated in the United States are considered to be U.S. residents even if they have no "physical presence" in the United States.

U.S.-RESIDENT CUSTODIAN – A custodian located in the United States, including a U.S.-resident affiliate of a foreign custodian.

U.S.-RESIDENT END-INVESTOR – An entity located in the United States, including a U.S. affiliate of a foreign end-investor, that either invests for its own account (for trading, investment and other purposes) or on behalf of others, including assets pools. U.S.-resident end-investors include managers of a mutual fund, managers of assets held for insurance company policyholders, and managers of pension and endowment funds.

ZERO-COUPON BOND – Bonds that do not provide interest payments. Zero coupon bonds usually have an issue price well below 100% of the face value with repayment on maturity at face value or par. The investors' return is the difference between the issue price and redemption value. These securities are reported as security type **8** (zero coupon & stripped security).
